Career objective

Computer Science Engineering student graduating in 2026 with a strong foundation in Python programming, software development, and machine learning. Hands-on experience gained through internships, hackathons, and academic projects, building practical applications using Python, SQL, Javascript, and Streamlit. Skilled in problem-solving, debugging, data processing, and developing end-to-end solutions. Eager to contribute technical skills, learn new technologies, and grow as a Python Developer in a collaborative and fast-paced environment.

Education

Malla Reddy College of Engineering for Women
B. Tech in computer Science

Year: 2026
CGPA: 8.73

Technical Skills

- **Programming Languages:** Python, Javascript
- **Python Ecosystem:** NumPy, Pandas, TensorFlow, OpenCV, Streamlit
- **Web Technologies:** HTML, CSS, Bootstrap, React.js, Node.js
- **Databases:** MySQL
- **Tools:** VS Code, Git, GitHub, Jupyter Notebook
- **Core Concepts:** Data Structures, Algorithms, Object-Oriented Programming, Problem Solving

Experience

AI/ML Intern | Infosys Springboard

Oct 2025 – Jan 2026

- Developed machine learning solutions in Python for real-estate price prediction using structured datasets.
- Built end-to-end data pipelines including preprocessing, feature engineering, model training, and evaluation.
- Created an interactive Streamlit dashboard for prediction and visualization.
- Applied data analysis techniques using Pandas and NumPy to improve model performance.

Projects

Fake Social Profile Detection Using Neural Networks

Technologies: Python, TensorFlow, Pandas, NumPy

- Developed a neural-network-based system to classify fake and genuine social media profiles.
- Performed data preprocessing, feature extraction, and model training using Tensor Flow.
- Evaluated model performance using standard machine learning metrics.

Smart Stay – Hostel Management System.

Technologies: Python, Django, HTML, CSS, JavaScript, MySQL.

- Developed a web-based hostel management system to automate tenant registration, room allocation, payment tracking, and grievance management.
- Designed separate Admin and Tenant dashboards for streamlined operations.
- Implemented authentication, database management, and role-based access control.
- Improved operational efficiency by replacing manual record-keeping with a centralized digital platform.

Virtual Shopping Through Webcam.

Technologies: Python, OpenCV.

- Developed a real-time virtual shopping platform enabling webcam-based interaction.
- Applied computer vision and image processing techniques to improve interaction accuracy.
- Optimized system performance for smooth and responsive user experience.

Leadership & Achievements

Team Lead — Smart India Hackathon (SIH) 2025

- Led a team of 6 members in developing a Traffic Number Plate Recognition and Helmet Detection System using Python, OpenCV, OCR, and YOLO.
- Managed task allocation, project coordination, testing, and final presentation.
- Demonstrated leadership, teamwork, problem-solving, and project management skills in a national-level hackathon.

Certifications

- NPTEL – Problem Solving Through C Programming (Elite)
- NPTEL – Internet of Things (Elite + Silver)
- NPTEL – Developing Soft Skills and Personality Development (Elite + Silver)
